RE: Connecticut River concerns -

- EXTREME WATER LEVEL FLUCTUATIONS
- CAMPSITE LICENSE TERMS

Turners Falls Project No. 1889-081  
Northfield Mountain Pumped Storage Project No. 2485-063

Dear Commission,

I have resided in Gill for 35 years and own 7 acres that abutt First Light's property, I own Camp #14W located at the corner of King Philip's Abyss and Horse Race and have a Life-Use License with First Light GDF Suez.

I am a member of The River Residents Association. The Association is comprised of people who own camps, cottages, and homes along the river. There are 24 "licensed" sites on project lands, and, there are also private land owners, and members of private clubs that recreate on the Connecticut River within the Turners Falls/Northfield MA section of the river.

We are concerned for the future of this beautiful natural resource, as well as our existence along the rivers banks. We take exception to it being called the "lower reservoir" of the Northfield Mountain Pumped Storage project.

As many of us live on the river, we see things changing, sometimes on a daily basis.

**Our major concern is the negative effects we see occurring from extreme erratic water level fluctuations.**

The following are observations by people who live and recreate along the river. Many of us have spent decades here.

## Page 2 of 4 – River Residents Association

### Observations included but not limited to -

- erosion along the shores
- loss of recreation areas that allowed boat access, now have no shoreline, only steep banks to climb
- lack of adequate tenting facilities
- silt and sediment buildup
- sand bars that come and go
- algae growth in Barton Cove
- damage to personal property at “low tides” – torque damage to docks, boats stranded rocks/stuck in mud
- wetland/cattail/marsh habitat changing/vanishing
- land mass loss to islands
- sand bank habitat and swallows gone
- beaches appear and disappear within hours
- backwaters/shallows/coves depths diminishing
- less heron, osprey and kingfisher sightings
- less dragonflies seen
- changes in fishing bounty
- Fish egg nests exposed at “low tides” drying out and dying
- Waterfowl breeding grounds unexpectedly become submerged and eggs rot or offspring drown

We believe everyone here wants to work together to ask the right questions and find effective solutions. We feel we, the river residents, are an integral part of this process.

Is there a way to create moderation, or eliminate altogether, dramatic water level fluctuations? Can it be, should it be, regulated differently? For the record, the Association strongly favors research into a “closed loop” system. It would be a true man-made reservoir that would no longer involve the river for the generation of electricity.

We have prepared a visual exhibit. We hope it will enlighten, and underscore some of the concerning observations we have stated.

Our other concern is about our continued existence as residents along the river. Most of us in this association are “Camp” owners with a “License” agreement allowing us to occupy the land.

Our existing structures are a historical use that began back in the early 1920’s and the previous licensees for these projects issued permits to manage their use. However, prior to 2008, the previous licensors did not seek Commission approval of these uses and occupancies of project property. Someone dropped the ball along the way. We owe great thanks to Mr. John Howard of the Northfield Mountain Pumped Storage facility for noticing this oversight. He realized there was no mention of the existing residential and private structures and took action to correct this. An application was filed in October

**Page 3 of 4 – River Residents Association**

**2008, requesting Commission authorization to issue revocable 5-year licenses, as well as, life-use licenses (permits) for us on lands at the Northfield Mountain and Turners Falls**

**Hydroelectric Projects (FERC Project Nos. 2485-050 and 1889-069). The Commission granted an ORDER MODIFYING AND APPROVING NON-PROJECT USE OF PROJECT LANDS AND WATERS. It was issued October 28, 2009.**

**As licensees, we are mandated to do certain things, inspected once every year and be “in compliance” with the terms First Light Hydro Generating Company sets forth. As you can imagine, it’s unsettling to not know if all our love, sweat and money spent on our river homes will be for naught at the end of a 5-year license.**

**The power company reaps many rewards using the river to generate power. For nearly 100 years our families have lived and recreated on this stretch of the river. We see ourselves as assets to this majestic waterway, and yet we have no reassurance that we’ll have any future past 5 years. It’s a very one sided situation and tenuous position to be in.**

**We act as caretakers, we are self appointed “Stewards.” We are the eyes and ears of the woods and waters. We investigate smoke sightings in the woods and have aborted forest fires, provide shelter and rides to people in canoes caught in storms, tow boaters out of gas or with broken engines and props, rescue anglers and others who fall over board and can’t swim, rescue kayakers who flip during cold water months, pick up countless amounts of trash after the “weekend warriors,” assist novice boaters and escort weary paddlers, rescue women in labor off the water to get to hospital, and sadly, even help search for bodies.**

**As proprietors of our footprints, we take seriously the investment in our lifestyle on the Connecticut River, both financially and emotionally. The majority of us have remodeled and made improvements to our properties. We have taken great pride in bettering our environments. We have given gladly and are gifted by the beauty, serenity and solitude the river offers. We delight in her recreational diversity. We celebrate family and friends, generation after generation. And, we continue on year after year in blind faith, that our 5-year licenses will be renewed. Does this seem equitable?**

**We realize we make the assumption that you, the Federal Energy Regulatory Commission and First Light Hydro Generating Company, want us to remain on project lands. It would be nice to know how you actually view us. What laws, if any, protect our interests?**

**We’d like a clearer understanding of how the licenses are administered. We’ve been under the impression that FERC governs over the use of the lands. However, according to the language in the “Order” approving use of project lands dated October 2009, it appears that First Light Hydro Generation Company makes the decisions governing us, the licensor’s. Does FERC have any say in our interests? Is there a liaison within the FERC organization that can work with our Association in helping us better understand our rights**

**Page 4 of 4 – River Residents Association**

**and responsibilities? How can we alter the current arrangement to meet our present and future needs?**

**We respectfully ask for consideration in lengthening the license term commensurate to the number of years approved for First Light Hydro Generation Company's new license to operate beginning in 2018. What is the procedure to effectuate this?**

**We endeavor to continue to assist and promote an ongoing cooperative relationship with all parties' interest in mind. We are dedicated to a life worth living on a river worth loving. We thank you for your time and respectfully submit this inquiry and photographs to the Commission.**

Sincerely,

---
