

Dorothy McIver, Greenfield, MA.

I am writing to comment on the power canal hydraulic study relicensing process which will determine conditions in the Connecticut River for many decades. P-1889 (the Turners Falls Dam) and P-2485 (the Northfield Mountain Dam). I urge you to take the time to do the research and studies necessary to make the best possible decision for this beautiful river which is such a precious resource and deserves to be protected as do all the aquatic life forms which inhabit it.
