Re: Confidential Draft Historic Properties Management Plan: Northfield Project
Turners Falls Hydroelectric and Northfield Mountain Pumped Storage Projects, (FERC Nos.
1889 and 2485)

Dear Frank Winchell:

FirstLight Hydro Generating Company (FirstLight) has prepared the attached draft Historic Properties Management Plan (HPMP) in connection with the Federal Energy Regulatory Commission's (the Commission's) relicensing of FirstLight's Northfield Project, consisting of the Turners Falls Hydroelectric and Northfield Mountain Pumped Storage Developments. The Project is located on the Connecticut River in Franklin County, Massachusetts, Cheshire County, New Hampshire, and Windham County, Vermont.

FirstLight has developed the draft HPMP to guide its consideration and management of historic properties listed in or eligible for listing in the National Register of Historic Places—including precontact period sites, historic period districts, sites, buildings, structures, and objects—throughout the term of a new FERC license. The HPMP is intended to assist the Commission in meeting its obligation under Section 106 of the National Historic Preservation Act (NHPA), as amended, to consider the effects of relicensing of the Project on historic properties.

FirstLight is filing the draft HPMP with the Commission as part of its Final License Application for the Project. Because the HPMP contains sensitive information about the nature and location of historic properties which is not to be disclosed to the public, FirstLight has requested that the Commission accord the document privileged treatment and place the document in its non-public files.

FirstLight requests your review and comments on the draft HPMP, as a consulting party for NHPA Section 106 purposes. Given the sensitive information contained in the document, FirstLight requests that you treat the draft HPMP confidentially. To maintain the information as confidential, FirstLight also asks that you provide your comments directly to FirstLight at the address below [or by email at firstlight@gomezandsullivan.com]. FirstLight will consider all comments of consulting parties on the draft HPMP in the development of a final HPMP.

If you have any questions about the draft HPMP or any aspect of the relicensing process for the Project, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Gus Bakas", is written over a white rectangular area.

Re: Confidential Draft Historic Properties Management Plan: Northfield Project
Turners Falls Hydroelectric and Northfield Mountain Pumped Storage Projects, (FERC Nos.
1889 and 2485)

Dear Lucy Cannon-Neel:

FirstLight Hydro Generating Company (FirstLight) has prepared the attached draft Historic Properties Management Plan (HPMP) in connection with the Federal Energy Regulatory Commission's (the Commission's) relicensing of FirstLight's Northfield Project, consisting of the Turners Falls Hydroelectric and Northfield Mountain Pumped Storage Developments. The Project is located on the Connecticut River in Franklin County, Massachusetts, Cheshire County, New Hampshire, and Windham County, Vermont.

FirstLight has developed the draft HPMP to guide its consideration and management of historic properties listed in or eligible for listing in the National Register of Historic Places—including precontact period sites, historic period districts, sites, buildings, structures, and objects—throughout the term of a new FERC license. The HPMP is intended to assist the Commission in meeting its obligation under Section 106 of the National Historic Preservation Act (NHPA), as amended, to consider the effects of relicensing of the Project on historic properties.

FirstLight is filing the draft HPMP with the Commission as part of its Final License Application for the Project. Because the HPMP contains sensitive information about the nature and location of historic properties which is not to be disclosed to the public, FirstLight has requested that the Commission accord the document privileged treatment and place the document in its non-public files.

FirstLight requests your review and comments on the draft HPMP, as a consulting party for NHPA Section 106 purposes. Given the sensitive information contained in the document, FirstLight requests that you treat the draft HPMP confidentially. To maintain the information as confidential, FirstLight also asks that you provide your comments directly to FirstLight at the address below [or by email at firstlight@gomezandsullivan.com]. FirstLight will consider all comments of consulting parties on the draft HPMP in the development of a final HPMP.

If you have any questions about the draft HPMP or any aspect of the relicensing process for the Project, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Gus Bakas", written over a white rectangular area.

The Project is located on the Connecticut River in Franklin County, Massachusetts, Cheshire County, New Hampshire, and Windham County, Vermont.

FirstLight has developed the draft HPMP to guide its consideration and management of historic properties listed in or eligible for listing in the National Register of Historic Places—including precontact period sites, historic period districts, sites, buildings, structures, and objects—throughout the term of a new FERC license. The HPMP is intended to assist the Commission in meeting its obligation under Section 106 of the National Historic Preservation Act (NHPA), as amended, to consider the effects of relicensing of the Project on historic properties.

FirstLight is filing the draft HPMP with the Commission as part of its Final License Application for the Project. Because the HPMP contains sensitive information about the nature and location of historic properties which is not to be disclosed to the public, FirstLight has requested that the Commission accord the document privileged treatment and place the document in its non-public files.

FirstLight requests your review and comments on the draft HPMP, as a consulting party for NHPA Section 106 purposes. Given the sensitive information contained in the document, FirstLight requests that you treat the draft HPMP confidentially. To maintain the information as confidential, FirstLight also asks that you provide your comments directly to FirstLight at the address below [or by email at firstlight@gomezandsullivan.com]. FirstLight will consider all comments of consulting parties on the draft HPMP in the development of a final HPMP.

If you have any questions about the draft HPMP or any aspect of the relicensing process for the Project, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Gus Bakas", is written over a light blue horizontal line.

Re: Confidential Draft Historic Properties Management Plan: Northfield Project
Turners Falls Hydroelectric and Northfield Mountain Pumped Storage Projects, (FERC Nos.
1889 and 2485)

Dear Peggy Fullerton:

FirstLight Hydro Generating Company (FirstLight) has prepared the attached draft Historic Properties Management Plan (HPMP) in connection with the Federal Energy Regulatory Commission's (the Commission's) relicensing of FirstLight's Northfield Project, consisting of the Turners Falls Hydroelectric and Northfield Mountain Pumped Storage Developments. The Project is located on the Connecticut River in Franklin County, Massachusetts, Cheshire County, New Hampshire, and Windham County, Vermont.

FirstLight has developed the draft HPMP to guide its consideration and management of historic properties listed in or eligible for listing in the National Register of Historic Places—including precontact period sites, historic period districts, sites, buildings, structures, and objects—throughout the term of a new FERC license. The HPMP is intended to assist the Commission in meeting its obligation under Section 106 of the National Historic Preservation Act (NHPA), as amended, to consider the effects of relicensing of the Project on historic properties.

FirstLight is filing the draft HPMP with the Commission as part of its Final License Application for the Project. Because the HPMP contains sensitive information about the nature and location of historic properties which is not to be disclosed to the public, FirstLight has requested that the Commission accord the document privileged treatment and place the document in its non-public files.

FirstLight requests your review and comments on the draft HPMP, as a consulting party for NHPA Section 106 purposes. Given the sensitive information contained in the document, FirstLight requests that you treat the draft HPMP confidentially. To maintain the information as confidential, FirstLight also asks that you provide your comments directly to FirstLight at the address below [or by email at firstlight@gomezandsullivan.com]. FirstLight will consider all comments of consulting parties on the draft HPMP in the development of a final HPMP.

If you have any questions about the draft HPMP or any aspect of the relicensing process for the Project, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Gus Bakas".
